

## HIND GEO GROUT

### PRODUCT DATA SHEET

#### POLYMER BASED GROUTING COMPOUND FOR SOIL STABILIZATION

##### DESCRIPTION

**Hind Geo Grout** is a blend of water soluble, high molecular weight polymers, supplied as a white free flowing compound in granular form. When added to water it reacts chemically to form a thixotropic gel. The gel is poured into the formwork before concreting which penetrates into the fissures of the soil strata at various level and stabilizes the loose soil from collapsing. **Hind Geo Grout** is an effective grouting compound and its penetration into the different layers of the soil strata not only stabilizes it, but allows future plantation and greenery to be developed all around the area where it has been used.

##### USES

- Soil stabilization and effective ground water sealing.
- Prevents collapsing of loose soil making concreting very easy in loose soil.
- To provide a watertight, impermeable soil mass.

##### ADVANTAGES

- Use of **Hind Geo Grout** for soil stabilization allows future plantations and development of greenery which is restricted by use of bentonite.
- Its thixotropic gel penetrates into very fine fissures of the soil strata making it to form a compact soil mass which resists collapsing of loose soil at the time of concrete placing.
- Non-toxic, very safe to handle and eco-friendly.

##### APPLICATION

The entire pouch of **250 gm** of **Hind Geo Grout** is added to **20 Ltr.** of water and stirred properly until the entire quantity gets dissolved in the water. After **2-3** minutes of mixing the compound starts reacting chemically with water and slowly turns into a gel like compound. This gel is now poured into the formwork which stabilizes the loose soil from collapsing. Our recommended dosage for **Hind Geo Grout** is **0.60 Kg** per **M<sup>2</sup>** area. However it is suggested to finalize the exact dosage depending on soil condition at site.

##### PROPERTIES

Aspect	White free flowing Granular Compound
pH (5% Solution)	7
Viscosity (5% Solution) at 27 <sup>0</sup> C	< 1500 cps
Ionic Charge	Anionic
Solubility in water	Completely soluble

##### SHELF LIFE

**12** months from the date of manufacture. Material should be stored in a perfectly covered dry place.

## PACKING

Available in 250 gm Plastic Pouch pack.

## HANDLING PRECAUTION

**Hind Geo Grout** is non-toxic and ingestion is to be avoided. If contact with eyes occurs, wash well immediately with water and seek medical advice.
